PROFILE

Data analyst who turns messy operational data into clear, data-driven decisions. Shipped 30+ dashboards and automated manual Excel reporting as a Data Analyst Intern; completing a Professional Master's of Information Systems (May 2027). Skilled in SQL, Power BI, Tableau, Python, and Excel, with project work in sports, real estate, retail, and healthcare operations.

EDUCATION

Professional Master's of Information Systems (Emerging Technologies) | University of Arkansas *Expected May 2027*
BSBA, Information Systems – Business Analytics, Finance minor | University of Arkansas *Awarded May 2025*

EXPERIENCE

Data Analyst Intern | Rise Physical Therapy *Apr 2025 – Present*

- Built and shipped 30+ clinic and team dashboards, comparative reports, and year-over-year views that support the Director of Operations in monitoring performance.
- Automate manual Excel reporting and develop AI-assisted reporting workflows with validation and reconciliation checks; conduct market research.
- Analyze clinic reports and trends in scheduling, clinical efficiency, and patient outcomes to support operational recommendations.
- Incorporate HIPAA privacy and security considerations into AI workflow design by using synthetic development data, limiting unnecessary patient fields, and documenting approved-environment and access requirements.

Student Manager and Facility Supervisor | University Recreation, University of Arkansas *Oct 2021 – Feb 2026*

- Supervised student staff across recreation facilities and coordinated daily service for members, faculty, and staff.

SELECTED PROJECTS

Arkansas Housing Market Data Warehouse and BI Analysis | Academic team project | SQL Server, Python, Power BI

- Co-built a county-level SQL Server warehouse with four fact tables (property, crime, population, economics) on shared county and date dimensions, loaded from the Census API via Python and 15 CSV sources.
- Individual analysis: Washington County home values rose about \$8,000 per reported crime reduced (2020-2023); Benton, Saline, and Faulkner each exceeded \$1,000, presented as association rather than causation.

NFL Draft and Contract Analytics | Academic team project (4) | Tableau, ANOVA, correlation

- Found that linemen and tight ends hold 6 of the 7 longest average careers by position (ANOVA, $p < .0001$) and that guaranteed amounts differ by signing team ($p = .0455$).

Hog Heaven Membership Predictive Analytics | Academic team project (3) | SAS Enterprise Miner

- Gradient boosting cut misclassification from a 54.2% baseline to 21.9%, so about 4 in 5 calls would reach customers likely to buy; recency and email engagement were the top drivers.

DFW MedAI Analytics Assistant | Graduate team project | Python, Flask, Claude API | 2026

- Used an AI-assisted development workflow to create a Flask application connected to the Claude API that answers natural-language questions over 322,574 inpatient encounters (fictional course data).

LEADERSHIP

Chair (member since April 2023) | University Recreation Student Employee Advisory Board *May 2024 – May 2025*

- Represented student staff in discussions with UREC administrative leadership and advocated for staff and participant needs.

SKILLS

Data and reporting: SQL, SQL Server, Excel (automation), Power BI, Tableau; data preparation, dimensional modeling, data dictionaries, year-over-year and comparative reporting.

Programming and AI: Python, C#, GitHub; Flask; AI-assisted development and analytical workflows with ChatGPT and Claude.

Analytical methods: Regression, decision trees, gradient boosting, neural networks, k-nearest neighbors, ANOVA, correlation, model evaluation.

Business practice: Requirements, use cases, process analysis, privacy-aware data handling, stakeholder communication, team leadership.
